

TECHNOLOGY DESIGNED TO HELP

Freedom. It's an essential part of an active life. It means setting your own agenda, getting behind the wheel and going where you want to go – whether you're running errands across town or visiting family and friends across the country.

Veigel North America / Mobility Products & Design gives you that freedom. For over 50 years, we've been designing and refining customized, ergonomic driving controls that keep you actively involved in your world.

Our easy-to-use hand controls make driving simple. Our wide selection of steering controls puts you in command of your vehicle, enabling you to enjoy a driving experience that minimizes fatigue. Our extension and foot controls make everyday tasks convenient for you – from turning the ignition key to setting the parking brake.

WWW.VEIGEL-NA.COM

- » steering controls, available in hook grip, palm grip, v-grip and tri-pin
- » foot controls, all with quick release system for easy removal without tools
- » accessories, such as foam covers, as well as horn and dimmer harnesses

HAND CONTROLS

THE CLASSIC II HAND CONTROL

4120CL 14"
4120CL 15.5"
4120CL 17"

The modern design of the Classic II, which fits perfectly with the interior of the newer vehicles, is smaller by 20%.

Our new Classic II hand control is made for simple and reliable operation. To accelerate, simply turn the ergonomic handle clockwise. To brake, push the unit slightly forward.

The mechanical brake lock can be easily engaged with the push of a button. The ergonomic handle can be adjusted to accommodate individual driver needs. The unit can be folded out of the way for ambulatory drivers.

90500-000 (H)

Our controls look as good as they perform, with finished surfaces and sleek lines to complement your vehicle's interior. They are adaptable to most cars, trucks, and vans, and they are flexible enough to allow an ambulatory person to operate the vehicle with ease.

Our controls are built to be reliable, providing you with years of dependable performance. We back each control with a full two-year warranty that gives you peace of mind as well as freedom.

Veigel North America / Mobility Products & Design's hand, steering and foot controls give you the ability to take control of your busy life, so you have the freedom to expand your world.

STEERING CONTROLS

PALM GRIP

Only Veigel North America / Mobility Products & Design offers this lightweight aluminum wrap. It can be adjusted to comfortably fit your hand and it will hold that shape for secure steering control. The soft, sheepskin liner protects your hand and provides warmth. A unique finger rest protects your fingers, plus the raised device keeps them from having minimal contact with the steering wheel.

V-GRIP

Only Veigel North America / Mobility Products & Design offers a foam-grip single pin and foam-covered aluminum wrap providing backhand support, your hand stays securely and comfortably in place. You can easily adjust the single pin to find the steering grip that's just right for you.

BALL GRIP

black
grey
wood grain

Our most popular steering control, the ball-grip presses firmly against the palm of your hand, giving you added strength and control for easy driving. The Spinner Knob is available in three colors to coordinate with your vehicle - Black, Gray or Woodgrain. Readily Detachable - have more than one onhand for a quick, easy update to your interior.

TRI-PIN GRIP

Your hand and wrist are comfortably secure with this lightweight tri-pin grip. The pins are fully adjustable, so you can easily find your individual comfort setting. An available counter weight takes away the Tri-pin Grip's weight, so you can mount it on the either side of your steering wheel. Easily replaceable foam cover for comfort.

COUNTER BALANCE

4 oz.
8 oz.
20 oz.

This counter balance was designed to be used in conjunction with any of the clam shell style steering devices to give you that little extra strength to turn the steering wheel and to return it back to center.

HOOK GRIP

Designed for those using a prosthetic hook (typically with two fingers). One finger goes on the outside of the ring, the other finger goes on the inside, securing you to the steering wheel for smooth handling.

SOFT GRIP

grey
black

The steering device is one of the most visible mobility adaptations and we've designed this one to look and feel good in your vehicle for extended driving. The ergonomic design is made of soft durable foam providing comfort for both long and short commutes. The mounting base is designed to clamp tight and hold strong. The Soft Grip can be installed on most any steering wheel, including the newer "lumpy" ergo grip steering wheels. The Soft Grip comes in grey or black with a matching base.

SINGLE PIN FOAM GRIP

You'll like the soft foam handle grip and the smooth steering motion. The secure grip gives you comfortable control and command of your vehicle.

EXTENSION CONTROLS

KEY EXTENSION

Driver evaluator recommended. The key extension provides additional leverage when starting your vehicle. A powder-coated disc allows the installation of most keys that incorporate computer chips. The extension is fully adjustable and may be locked in position. It will accommodate two keys and a strap, if so desired. The key extension may be used anywhere a key is used; vehicle, home or office are a few of the many uses.

RIGHT HAND TURN SIGNAL LEVER EXTENSION

This lightweight crossover lever operates your turn signals easily. We install these products using bands, not screws, leaving your vehicle's interior undamaged.

PARK BRAKE EXTENSION

11"
14"
Long, sturdy, and easy to reach, this extension makes setting your parking brake a simple task. It adjusts easily for use in a variety of vehicles.

HAND STYLE EMERGENCY BRAKE HANDLE

This handle is designed to push button in for more leverage in one easy motion.

T-HANDLE STYLE GEAR SHIFT EXTENSION

Our gear selector can be mounted on the left or right. Designed to push button in and gives extra leverage in one motion to shift.

DASH STYLE GEAR SHIFT LEVER EXTENSION

This dash style gear shift lever is designed to push side button in and shift in one easy motion and proves better leverage when shifting.

LEFT HAND TURN SIGNAL LEVER EXTENSION DROP STYLE

This lightweight drop lever operates your turn signals easily when using hand controls. We install these products using bands, not screws, leaving your vehicle's interior undamaged.

VERTICAL GATED GEAR SHIFT EXTENSION

This new vertical gear shift is designed for the newer vehicles with a gated gear shift. This can be used on dash mounted and counsel mounted shifters. With gated shifters, there are no buttons, allowing for better leverage and smooth shifting.

HORIZONTAL GATED GEAR SHIFT EXTENSION

This new horizontal gear shift is designed for the newer vehicles with a gated gear shift. This can be used on dash mounted and counsel mounted shifters. With gated shifters, there are no buttons, allowing for better leverage and smooth shifting.

HAND CONTROLS

THE COMPACT II HAND CONTROL

4220CP 14"
4220CP 15.5"
4220CP 17"

Proven technology, sleek and elegant design - that is how the Compact hand control is made. The function is simple: to accelerate, pull the ergonomically shaped handle backwards, a slight push in the forward direction operates the brake. The mechanical brake lock can be easily engaged with the push of a button. The handle is shaped in such a way that the hand can rest on it while driving. This means relaxed and effortless driving, even on long distances. The hand control can be folded out of the way when not in use.

COMMANDER FOR COMPACT II HAND CONTROL

4220CPC 14"
4220CPC 15.5"
4220CPC 17"

Our Compact hand control can be upgraded to add a five button switch to control secondary functions like the turn signals, wipers, horn, etc... The commander upgrade comes complete with a relay box.

3502 PUSH RIGHT ANGLE WITH WRIST SUPPORT

Classic 3502WHD

This hand control offers a foam grip handle with a soft foam wrist support and side hand guard for additional leverage, comfort and convenience for the driver. Both foam grips are soft, washable, replaceable and are not heat sensitive. Our exclusive centerpivot allows the grip to be pivoted away from the door for more hand clearance.

An optional offset handle may be incorporated with the wrist support grip to provide additional knee clearance, more leverage or to locate the handle closer to the turn signal. The offset handle can also be used to adjust the angle for pitch of the wrist support grip.

THE BASIC HAND CONTROL

4300B 15.5" Veigel Basic V3 w/ Black Knob
4300B 15.5 Veigel Basic V3 w/ Tri-Pin w/switches
4300B 17.5" Veigel Basic V3 w/ Black Knob
4300B 17.5 Veigel Basic V3 w/ Tri-Pin w/switches

Our Basic hand controls are a simplified, no frills version of the 4200 CP Compact hand control. This new version has been upgraded with many great features. It comes standard with a leather cover and the handle height can be easily adjusted to fit each individual. The hand grip can be interchanged with any of our standard steering devices and can be upgraded to include a tri-pin with turn signal switches. The New Basic offers first rate quality at a competitive price.

COMMANDER FOR CLASSIC II HAND CONTROL

4120CLC 14"
4120CLC 15.5"
4120CLC 17"

Our new Classic II hand control can be upgraded to add a five button switch to control secondary functions like the turn signals, wipers, horn, etc... The commander upgrade comes complete with a relay box.

3700 PUSH / PULL HAND CONTROL

3700

A Tri-Pin Grip that is convenient, comfortable and fully adjustable is used to activate the push/pull movement of this control. This grip may also be custom fitted to operate the turn signals, horn or dimmer. The control can be mounted for either left or right hand operation in most full size and lowered floor minivans.

For your convenience, our site also includes a dealer locator search service using your zip code, so you can quickly find nearby dealers.

HAND CONTROLS

3300 PUSH ROCK

- Vertical Gas Lever
- 3300KT Soft Grip Tradition Handle
- 3300KV Soft Grip Veigel Handle
- 3300FT Foam Grip Traditional Handle
- 3300VKT Vinyl Grip Traditional Handle
- Horizontal Gas Lever
- 3300KT Soft Grip Traditional Handle
- 3300KV Soft Grip Veigel Handle
- 3300VKT Vinyl Grip Traditional

The 3300 Push-Rock hand control includes a removable handle for added safety. The 3300 is offered in two different handle types; the Traditional handle and the Veigel handle. The Veigel handle has been designed to maximize leverage and improve feel while limiting the accidental braking during acceleration common with other push/rock hand controls. The Push-Rock is available in two gas lever styles; Vertical (VGL) or Horizontal (HGL). The VGL is the traditional hand control. The HGL improves leverage and allows for minor leverage adjustment as well as an increase in legroom by more than 1.5 inches.

3400 PUSH / PULL

- 3400K Knob Grip Straight Handle
- 3400F Foam Grip Straight Handle
- 3400KX Knob Grip Offset Handle
- 3400FX Foam Grip Offset Handle

Push to brake and pull back to accelerate. This hand control can be adjusted to accommodate several different leverage settings depending on individual needs. It is also offered in the foam grip and offset handle versions.

3501 BRAKE ONLY

- Classic 3501KB
- Classic 3501FB
- Classic 3501KBX
- Classic 3501FBX

3500 PUSH RIGHT ANGLE HAND CONTROL

- 3500K Knob Grip Straight Handle
- 3500F Foam Grip Straight Handle
- 3500KX Knob Grip Offset Handle
- 3500FX Foam Grip Offset Handle

This hand control comes with a knob grip that fits comfortably in the palm of the hand. The knob grip and bent brake rod are standard on this unit. The bent brake rod allows mounting the handle control higher in the vehicle to provide more driver convenience and comfort. The exclusive center pivot of our control allows the grip to be pivoted away from the door for more clearance.

Options include:

- » A foam grip which is two inches longer in length than most hand controls, ensuring comfortable driving control and greater leverage when braking and accelerating.
- » An offset handle with knob grip which is fully adjustable 360° to provide additional knee clearance, more leverage and locate the handle closer to the turn signal. The offset handle can also accept the foam grip for added comfort and leverage.

TRANSFER BOARD

DRIVER SIDE TRANSFER BOARD PASSENGER SIDE TRANSFER BOARD

The transfer seat board bridges the gap between the wheelchair and the seat, greatly easing the transfer into and from your vehicle. For optimal comfort and leg room, we have reduced the size of the transfer board. The board is simply folded up while driving. Removable in seconds without the need for tools.

FOOT CONTROLS

ACCELERATOR GUARD

The Accelerator Guard is recommended by driver evaluators to be used with hand controls. It protects the driver from inadvertently resting their foot on the accelerator. The quick release mechanism allows the Accelerator Guard to be easily removed without tools, permitting ambulatory drivers full use of the accelerator pedal.

ACCELERATOR / BRAKE GUARD

The Accelerator Brake/Guard is recommended by driver evaluators to be used with hand controls. It protects the driver from inadvertently resting their foot on the accelerator or brake pedal. It also shields the driver from unintentionally placing their foot under either pedal. The Accelerator/Brake Guard is sturdy and features a convenient carrying handle. The quick release mechanism allows it to be easily removed without tools, permitting ambulatory drivers full use of the pedals.

Taken out for ambulatory driver.

A/B Guard for More Foot Clearance

LEFT-FOOT ACCELERATOR

The left-foot accelerator is recommended by driver evaluators for drivers to accelerate using their left foot. It is equipped with a guard to prevent the driver from inadvertently resting their right foot on the accelerator pedal. The left-foot accelerator incorporates a quick release mechanism and is easily removable for ambulatory drivers without tools.

VEIGEL ACCELERATOR / BRAKE GUARD WITH TRIM

An important safety element that prevents unintentional use of pedals. The Veigel Pedal Guard solution is stylish and safe. The concave shape of our pedal guard protects from unintentional use of the gas and brake pedals while providing maximum legroom for the driver. This unique design also incorporates a quick release connection similar to a socket wrench. This quick release connection allows the pedal guard to be removed in seconds without the use of tools.

VEIGEL ACCELERATOR / BRAKE PEDAL EXTENSIONS

Utilizing the same quick release system as the pedal guard, our pedal extensions can be removed in seconds without the use of tools allowing taller people to drive the vehicle. Pedal Extension 2" - 8".

REHAMOTIVE

Many states either require or recommend that anyone using our products have a driver evaluation prior to installation. We recommend all customers have a driver evaluation performed by a qualified evaluator. If you need assistance contact www.driver-ed.org or call Veigel North America / Mobility Products & Design toll free 1.800.488.7688.
