

## SURE GRIP RECREATION

Sure Grip's push/rock hand controls have always given drivers great control of their vehicle on the road. That same great control is available off the road with Sure Grip's line of recreational controls designed to fit off-road utility vehicles. The upright position of the push/rock handle allows for superior control when heading off the beaten path.

# SIDE BY SIDE UTILITY VEHICLES

## OFF THE ROAD AND ON THE FARM

Sure Grip's push/rock hand controls have always given drivers great control of their vehicle, and now Sure Grip has special hand controls designed for use in off road vehicles. With Sure Grip's handle in the upright position the ability to drive with both hands on the wheel gives you control and precision for heading off the beaten path.

*"The best thing about these hand controls versus the other brands is that they are custom specific to the different UTVs."*

- Todd Eldridge, Hunterworks Inc.

# GOLF CARTS

## ON THE ROAD OR THE GOLF COURSE

Sure Grip has not only designed controls for off road utility vehicles, but also specific applications for all popular brands of golf carts. This makes shooting 18 holes or just cruising in your golf cart easier than ever.

*"We recently installed a set of Sure Grip hand controls on a Polaris Ranger RZR. Our technicians found that the installation was very simple with only minor modifications. Our client has had countless hours of enjoyment with his ATV since the installation. Sure Grip hand controls have allowed him the freedom of mobility in the great outdoors. Sure Grip is a leader in providing us with great mobility solutions for our active clients."*

- Ed Stang, Mobility Manager  
CanAm Mobility, Kelowna, BC
